- **M.A. Financial Economics** 07/11 – 04/13
Gokhale Institute of Politics and Economics, Pune
- **B.A.(Hons.) Economics** 07/06 – 04/10
University of Delhi, Delhi

RESEARCH STATEMENT

- ***Examining the empirical foundations of business cycle and growth theories.*** I place particular emphasis on understanding how *human capital*, *social capital*, and *intellectual capital* contribute to the broader dynamics of economic growth. I make a conscious distinction between Advanced Economies and Emerging Market Economies, recognizing that institutional structures, historical legacies, and macroeconomic constraints shape growth and labor dynamics in fundamentally different ways.
- ***Analyzing the formal and informal institutional structures that underpin the process of wealth generation.*** The focus lies in identifying the *institutional mechanisms* that influence the outcome, and in quantifying the socio-economic variables that critically shape the degree and dynamics of inequality within societies. This analysis is conducted with an explicit historical perspective, recognizing that distributional outcomes are deeply embedded in the evolution of political economy frameworks over time.

EMPLOYMENT

Entrepreneurial & Digital Initiatives

- **Dialogue With Manhar** 07/22 – Present
📺 [@dialoguewithmanhar](https://youtube.com/@dialoguewithmanhar)
🌐 manharsingh.net/dialogue-with-manhar
in [linkedin.com/company/dialogue-with-manhar](https://www.linkedin.com/company/dialogue-with-manhar)
